

Bhartiya Vidya Bhavan's
Sardar Patel Institute of Technology
(An Autonomous Institute Affiliated to University of Mumbai)
Bhavan's Campus, Munshi Nagar, Andheri (West), Mumbai-400058-India

7.1.10: The Institution has a prescribed code of conduct for students, teachers, administrators and other staff and conducts periodic programmes in this regard.

Report on the Student Attributes Facilitated by the Institution

Bhartiya Vidya Bhavan's, Sardar Patel Institute of Technology is a Numero Uno, self-financed, autonomous engineering institution affiliated to University of Mumbai (UoM). From the Academic Year 2022, the institute is also conferred the empowered autonomous status of UoM. The institute is under the umbrella of Bhartiya Vidya Bhavan, not just a conglomeration of more than 300 institutions across the globe, but a culture, a saga, a holy journey, started by Dr. K.M. Munshiji with the support of Mahatma Gandhi in 1938. Imparting value-based education with Indian cultural ethos has always been the motto of Bhartiya Vidya Bhavan.

Firstly, as per the philosophy of Dr. K. M. Munshiji, founder of Bhartiya Vidya Bhavans that Education would fail ignominiously in its objective if it manufactures only a robot and called him an economic man stressing the adjective economic and forgetting the substantive man.....". Secondly, the leadership of the institute strongly believes that Engineers & Technologists form the backbone of any nation's economic development. Today's engineering graduates are facing numerous challenges like rapid change in technologies, emergence of new career opportunities and social/environmental concerns. Engineers work for 40-50 years of their life they will have 3 to 4 diversified careers in technologies we are even unaware of. It also believes in multidisciplinary exposure to the learners, yet ensuring growth in one vertical, cherishing human sensitivity and empathy.

Thirdly, being an educational institution where the sole aim of the organisation is to life the mindset of the students to soar new heights, it has to be socially sensitive to make society better in all respects by providing quality education, remain consistent, and extends its services in education to one and all without any discrimination on any grounds. Therefore, integrity, social sensitivity, excellence, and globalization are institutional values. Bhartiya Vidya Bhavan's Sardar Patel Institute of Technology takes pride in working with moral and ethical standards.

K. Tale

In view of these the institute's Vision statement is to provide high quality education promoting Indian values and ethos with global competency leading to create an all-round person and finally develop professionals with competencies which is clearly stated in the Missions statements. S.P.I.T. focus on "How to learn?" rather than "What to learn?".

Under the guidance of true leadership and with the support of a dedicated and hardworking faculty and staff, the institution strives for facilitating students for achieving key attributes like excellence in all the fields of its curricular, co-curricular, and extra-curricular activities. Curricular aspects strengthen their knowledge and skill basics whereas, co-curricular activities give the students an opportunity to develop particular skills and exhibit their non-academic abilities. Through extracurricular activities, students get an opportunity to work with others and gain essential life skills. Further, at the institute level, department level various committees/student clubs/council/cell are formed. All these committees/student clubs/council/cell involve the students in their various activities. These activities are aligned to improve their leadership, interpersonal skills and self-confidence. This also allows them to link their academic knowledge with practical experience thereby leading to a better understanding of their own abilities and career goals.

Facilitating the development of these key attributes in students is essential for their success both academically and in their personal and professional lives. The institute uses the right of academic flexibility to tune the curriculum based on Outcome Based Outcome (OBE) philosophy wherein the Graduate Attributes (GAs) are well defined. Moreover, the institute incorporates the institutional values such as integrity, human values, national values, gender equality as the other key attributes of the students as a part of curriculum providing students with opportunities to practice and engage in these activities by creating a supportive and inclusive learning environment.

In the past many years, everyone witnessed the splendid academic performance, prizes won by our students at National/International level technical competitions, enrollment for higher studies at the best places of the world and sparkling placements (quantitative and qualitative). The dedicated efforts of the institute in achieving these attributes in students is presented in the form of Table 1. By doing so, the institute ensures that students are well prepared to face the challenges of the future and make meaningful contributions to their communities and society as a whole.

Sr. No	Student Attributes	Allied Activities to facilitate the Attributes
1	Adapt with the new environment and inculcate the ethos of the institution	Students come with diverse thoughts, backgrounds and preparations. It is important to assist them adjust in the new environment and inculcate in them the ethos of the institution with a sense of larger purpose. Keeping the above thought in mind AICTE, New Delhi proposes a 3-week induction program for the UG students entering the institution before the commencement of normal classes which will start only after the induction program is over. Its purpose is to make the students feel comfortable in their new environment, set a healthy daily routine, create bonding in the batch as well as between faculty, develop awareness, sensitivity and understanding of the self, society at large, and nature. The institute organizes Induction Programmes for newly admitted UG students. as per the philosophy proposed by AICTE, New Delhi. The various activities alleged to meet the requirements of Induction Programme as envisaged by AICTE are conducted every year.
2	Professional Knowledge	An Engineering graduate should have subject knowledge of his/her field and in entire professional life he/has to demonstrate the ability of Problem Analysis, Design/Development of Solutions, Usage of Modern Tools to Conduct the experiment. At the institute, these attributes of the students are practiced while they undertake credit Courses in the curriculum. The faculty members of the institute use innovative methods of Teaching-Learning Evaluations (TLE) as well as enhance their laboratory experience to imbibe this basic attribute in the students.
3	Socially Sensitive	An Engineering graduate should be able to apply the gained Professional Knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice. To mould students' minds, various activities are conducted by the students' clubs at institute level like IEEE, ECELL, WIE, CSI, Rotaract Club, NSS and at department level like FACE, ITSA, EETS, ESA. The institute also offers a wide spectrum of credit courses under ABLL@LLC (SEVA and SATVA) as well as a part of Mini, Major Project addressing this aspect.
4	Environment Consciousness for Sustainable Development	To understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate knowledge of and need for sustainable development, various initiatives taken for creating awareness include extension activities like Project Nirmalya for immersion Ganpati idol and Beach Clean-up, World' Largest Lesson; Introduction of Sustainable Development Goals to Children, Potholes Filling and awareness, Rally for Climate Change, Beach Clean-up Drive, Walk for Mangroves, and NSS activities etc. The institute also offers a wide spectrum of credit courses like Environmental Studies under ABLL@LLC (SEVA and SATVA) as well as a part of Mini, Major Project addressing this aspect.

5	Ethics	To inculcate the attribute of applying ethical principles and commit to professional ethics and responsibilities and norms of engineering practice, apart from the implementation of policy of Institutional Ethics Committee, various activities include Technical Paper writing competition held by R & D cell, assigning ethics as one of the rubrics during evaluations, and etc.
6	Team Spirit, Leadership skills, and Event Management	In real life while working in any organizations/team, one has to function effectively as an individual, and as a member or leader in diverse teams and in multi-disciplinary settings. To practice this attribute, students' council of the institute organizes cultural and technical events under the banner of Oculus, celebrates sport festival under the banner of SPOORTH with a huge participation of students within and outside. Institute also organizes competitions like Hackathon, Innovation Cup, Minor, Major Project competitions, and encourage students to participate in completions organized by institutes of repute like SIH, e-yantra, ACCS Design Challenge, etc., and assigning team work as one of the rubrics during evaluations, etc.
8	Project Management and Finance Management	The institute offers a track of Management courses under a minor certification from SPJIMR, a leading institute in Management & Research, a credit courses on Finance under ABLL@LLC (SEVA and SATVA) as well as evaluation of Minor, Major Project based on one of the rubrics as timeline of the project and managing the financial resources. S.P.I.T. E-cell activities are also aligned to this attribute.
9	Creative thinking	Activities like IEEE student chapter flagship event Project Innovation Challenge, S.P.I.T. IIC cell, Innovation Cup by ESA students' club, etc., and encouraging students to participate in completions organized by institutes of repute like SIH, e-yantra, ACCS Design Challenge, etc., Project Exhibition, Technical Paper Presentation (TPP) held by R&D cell makes the students to think out of box. All these facilitate the students to think creatively, innovatively and independently.
7	Communication	In order to meet the expectations of an effective communicate skills of an engineering graduate for designing documentation, writing effective reports, making effective presentations, and give and receive clear instructions on complex engineering activities with the engineering community and with society at large, various platforms are made available to students. A credit course in curriculum on Communication Skills and its allied activities is the beginning of it. This attribute is also developed through activities like Technical Paper Presentation (TPP) held by R&D cell, Patent Drafting and IPR as an open elective credit course, and writing reports on Minor, and Major Project and encouraging students to write proposals under completions organized by institutes of repute like SIH, e-yantra, ACCS Design Challenge, etc.

8	Life Long Learning	In order to prepare students to recognize the need for life-long learning in the broadest context of technological change and develop the ability to engage independently; the efforts taken by the institute are visible through tuning the contents of each course in curriculum by adding a topic on self-study and assigning extra hours for its evaluations in Teaching Scheme indicated as "O". Self-study skill is evaluated through Internal evaluation and a compulsory question in End Semester Examination. Participation of students in subject related guest lectures, and guest lectures, seminars, and workshops organized by various committees/clubs, R&D cell, SP-TBI on research issues, and cutting-edge technology also aids in developing this attribute through industrial visit, internship programs and live industrial projects. The Training and Placement Officer (TPO) of the institute held sessions on GRE, TOFEL and other competitive examination preparation preparing students for higher studies.
4	Employability	The Training and Placement Officer (TPO) of the institute held external training by various training institutes for developing aptitude and soft skills of the students and internal training includes sessions conducted by previously placed students and Alumni working with corporates who share their experiences and knowledge on select topics as requested by students. In tandem with external/internal training, corporate guest lectures and workshops are conducted on latest industry trends to better equip our students with respect to skill sets required at the workplace. A mentor is assigned to a group of ten students who guides the students through every step of the placement process.
8	National Values, Human Values, Communal Harmony	The institute celebrates various national days like Independence Day, Republic Day, Rastriya Ekta Divas, Yoga Day, Teachers Day, and celebrates linguistic and religious festivals like Chatrapati Shivaji Maharaj Jayanti, Garba night, Ganpati Festival, etc., conduct activities under NSS, Electoral Club. The institute also offers a wide spectrum of credit courses like Constitution of India under ABLL@LLC (SEVA and SATVA).
14	Gender Equality	Institute promotes gender equality by assuring balanced representation of students and staff at various committees at institute level, safety measures for girl and boy students, organizing various training programmes like self-defence, prevention of sexual harassment and personality development.
15	Holistic Development	The regular courses, student council/club activities, and extension activities are key components that assist students in developing a well-rounded personality by connecting them to current developments in industry and cutting-edge technology. These activities also enhance students' leadership, interpersonal skills, and self-confidence. Furthermore, they enable students to bridge their academic knowledge with practical experience, leading to a deeper understanding of their abilities and career aspirations.
