Criterion 6 - Governance, Leadership and Management

Policy Document on e-Governance

The 21st Century has witnessed tremendous advancements in technology particularly in ICT. It is well known that integration of ICT in governance helps to reduce the intricacy, make the work fast, cost-effective and improve the overall administration of the institution. The admission process, maintenance of students' personal and other academic records, submission of class assignments and projects, monitoring and evaluation, and communications with the stakeholders is unavoidable without ICT for sustainable development of the educational establishments and to protect and prevent an environment. The use of ICT is becoming the backbone of any country's growing economy in today's world of internet enabled systems and processes.

According to the UGC Quality Mandate document implementation of Electronic Governance (e-Governance) is given the prime importance to all the Higher Educational Institutions which includes: Digital Transactions, National Digital Library, Admissions, Planning, Examinations, Finance, Administration, Wi-fi connectivity for the entire campus and Student Grievance Portal. The UGC has mandated that all higher education institutions must adopt e-governance in its text and spirit. By routinely requesting reports, the UGC also keeps a close eye on each institution's progress towards e-governance implementation. Additionally, NAAC believes that

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri (W), Mumbai-58

at the time of assessment and accreditation, this is a crucial indicator. As a result, having an e-governance policy is crucial for any institution.

Bhartiya Vidya Bhavan's S.P.I.T. in its institutional values states inclusive development of a nation which is the necessity of a good higher education system in any country. For this reason, Sardar Patel Institute of Technology, Mumbai has taken several initiatives to use e-Governance. Also, this technology is proposed to be used right from student administration to various resource administration and it is creating transparency between the institute and students. From its inception in 1995, e-governance policy adopted by the institute has played a vital role in supporting powerful, efficient management and administration. It is observed that after the autonomous status, e-Governance @ S.P.I.T. as shown in Fig. 1 is ensuring efficient administration in the areas of Administration, Examination, Student Admission and Support, Finance and Accounts, and Feedback which are effectively running in synchronization and complementing each other.

The head of the institute proposes the new e-governance policy of the institute to the Governing Board (GB) as and when required. Upon receiving the approval of GB, the Finance Committee makes a provision in the budget for the same and takes the approval from the Campus Director of the institute. Accordingly, the Purchase Committee/Procurement Cell invites the quotation and procures the software tools and e-gadgets. However, for continuation of the existing e-governance policies of the institute, the budget is proposed by the Finance Committee and subsequently approved by the GB. The requisition for the renewal of such e-governance tools and/or e-gadgets are approved by the concerned HoDs, Deans, Registrar, and finally the Head of the Institute. Most importantly, the institute has demonstrated its flexibility in adopting and handholding e-governance policies to deliver excellence in the field of education during the Covid-19 Pandemic when the entire organization was in virtual mode.

I. ADMINISTRATION

The Administration of the institute functions with an e-governance system which is broadly classified into Academic Administration, Office Administration and Library Administration. Faculty and students use Moodle as a Learning Management System (LMS) for submission and evaluation of class assignments, projects, any other academic activities, and to keep the overall academic records of the students. The institute also procure campus wide licenses of few software like Matlab, LabVIEW, Manupatra, etc. Each and every class and laboratory is well equipped with ICT tools for engaging the students. During the pandemic, the institute adopted an online teaching-learning mechanism and procured the G-suite as well as Pentablet. The institute promotes the use of this technology and has set up a studio with cutting edge tools for developing e-content.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

[Handwritten Signature]

The office work is totally computerized. All office members use computers for administrative work. It uses e-resources for all administrative purposes right from Biometric attendance system to its employees, almost all the stakeholders of the institute use smart phones with inbuilt social apps like Gmail, official WhatsApp groups to communicate and to provide information of any events at the campus. With an initiative of IQAC, an inhouse online Self Appraisal platform developed by students under 6 months internship is proposed to be used shortly. Advertisements for faculty & staff positions are published in newspapers and posted on the website periodically. However, for the Ad hoc faculty positions, applications can be submitted through an online job portal.

The Central Library of the institute is Wi-Fi enabled, fully automated with an Integrated Library Management System (ILMS), e-learning resources like e-books, e-journals, etc., and institution repository on intranet with open-source software: DSpace having institution events, reports, institutional magazines, faculty publication, question papers, syllabus etc. According to the renewal policy of the publishers, the central library assures periodic renewal of the learning resources like e-books, journals, etc. The library also subscribes to new e-learning resources as and when required. The library uses barcode scanners for faster and accurate circulation. The library has a software integrated with QR-Code system to keep the records of transactions of learning resources. The Central Library also has a dedicated internet center for the students to access e-learning resources as well as accessing OPAC to obtain availability of learning resources. The e-governing policy of the institute also supports the Central Library to procure and maintain technology and tools needed to maintain its academic excellence. Thus, the policy of the institute is very flexible yet transparent for e-administration.

II. EXAMINATION

The institute has a separate Examination cell equipped with ICT tools necessary for examination purposes such as separate Desktops, internet facility, software tools for results and grading. The examination schedule and examination results are made available from time to time on the institute's website by examination cell. It provides an online payment facility for examination fees. The examination department uses the DSpace open-source digital repository maintained by the Central Library to upload exam schedules and results. An online portal is available at the examination cell for providing e-Transcripts to students for applying to foreign universities.

III. STUDENTS ADMISSION AND SUPPORT

The e-governance in this category starts with e-governance in First Year (F.E.) Admission which is one of the best practices of the institute. The F. E. admission process of the institute takes place in 2

Dean, Administration
Bharatiya Vidya Bhawan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

[Handwritten signature]

categories namely Admission via CAP rounds and Management Quota Admissions. The first category of admissions are entirely controlled by the Directorate of Technical Education. However, for the Management Quota Admissions, the institute has adopted a completely electronic infrastructure that includes online application form, online upload of the relevant documents and an online Admission Enquiry Portal available through the institute's website. The institute is also equipped with online fees transfer mechanism for admission fees to all its students.

The institution has a very effective e-student support system managed by its organizational structure with well-defined functions of each. The Research and Development (R & D) cell of the institute uses inhouse developed online portal to manage applications of fees reimbursement for the research-oriented papers published by its faculty and students, its approval status, and reimbursement status. This portal eases this process and maintains transparency. The Training and Placement Office (TPO) of the institute has a well-defined process for managing the records of the placed students as well as students opting for higher studies. The students seeking admission to higher studies in India or abroad need recommendation letters. In order to ease the process of applying for recommendation letters, approval by faculty, and most importantly to keep track of this process, an online portal of recommendation developed by the institute is effectively used by the TPO.

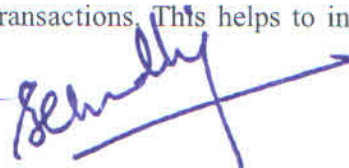

Mostly the students of the institute from various parts of the city use local railways for commuting to the institute and avail travel concession from railway authority under students category. According to the rules and regulations of the railways, the students need to fill the railway concession form and approve it from the office of the institute. To ease the process and maintain transparency, the online portal is developed by the institute which is managed by the administrative office.

The institute always strives to involve its stakeholders in every activity of the institute. The institute believes that its students are always first in this category. To achieve this mission, and to foster strong bonds between Alumni, Students and to get values for all stakeholders as well as growth in professional life, an online portal developed by the institute named SP-AN (Alumni Network) is very effectively managed by the Dean Students Affairs. Through this portal, passed out students of the institute can register to join the community of S.P.I.T. Alumni Network. Faculty members are also registered as an integral part of this network. Further, the Alumni can apply online, and may get contacted as & when there would be any suitable match for relevant activity or any vacancy position.

IV. FINANCE AND ACCOUNTS

The Finance and Accounts department of the institute is an integral part of the administrative office and is well equipped with a sufficient number of Desktop Personal Computers with internet connectivity and uses software tools to manage financial transactions. This helps to increase the

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W) Mumbai-58

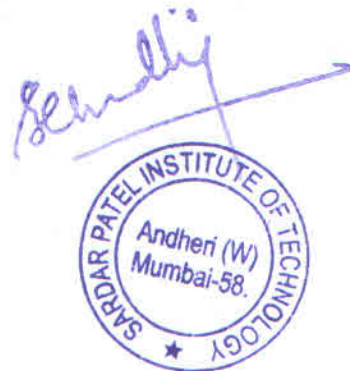

efficiency of staff towards accuracy in financial transactions. The administrative office maintains the reports and books of accounts generated from the software, which helps in auditing procedures.

V. FEEDBACK

Feedback is an essential element of the learning process. The institute collects feedback on various aspects at the institute through online Google Forms. The feedback collected from the individual faculty, Dean, HoDs are analyzed, and suggestions are communicated to IQAC & Head of the institute for its action plan in subsequent academic year. The Internal Quality Assurance Cell (IQAC) regularly collects online feedback from various stakeholders of the institute through its structured G Form to seek suggestions for its various policies and overall institutional growth.

Minutes of the 8th Governing Body Meeting

The 8th Meeting of the Board of Governors was held on 27th March 2021 at 2:30 p.m, in online mode. Following members of the Board attended the meeting:

- | | | | |
|----|-----------------------|---|----------------------------|
| 1. | Prof. Sesha Iyer | - | Chairman |
| 2. | Prof. Prachi Gharpure | - | Member, Management Nominee |
| 3. | Shri. Asif Mulla | - | Member, Management Nominee |
| 4. | Shri. Suresh Mhatre | - | Member, Management Nominee |
| 5. | Prof. V. M. Gadre | - | Member, from academia |
| 6. | Prof. S. G. Bhirud | - | Member, University Nominee |
| 7. | Prof. Y.S. Rao | - | Teaching Member |
| 8. | Prof. Surendra Rathod | - | Teaching Member |
| 9. | Prof. B.N. Chaudhari | - | Member Secretary |

Following members were granted the leave of absence:

- | | | | |
|----|-----------------------|---|-----------------------------|
| 1. | Prof. Ranjan Banerjee | - | Management Nominee |
| 2. | Prof. Pramod Naik | - | Nominee of State Government |
| 3. | Prof. Manju Singh | - | UGC Nominee |
| 4. | Shri Rahul Chari | - | Member, from industry |

Principal started the meeting with a tribute to the governing body member, Late Prof. S.C. Sahasrabuddhe. He narrated how his association was helpful to the institute to inculcate the culture of academic autonomy. All members observed one minute silence and paid homage to the departed soul.

Then, Principal introduced the new members (Prof. Gadre from IITB and Rahul Chari from Phonepay) inducted with the approval from the Chairman, GB as per the UGC guidelines. Similarly, Principal introduced the new nominee of Mumbai University (Prof. S. G. Bhirud, Deputy Director, VJTI) on the Governing Body. The Chairman and the members welcomed the new members on the Governing body.

Principal gave his presentation on his perception of S.P.I.T and his tentative action plan for the S.P.I.T. He briefly presented a SWOT analysis he carried out prior to joining the institute and also presented his 5 point action plan for the next 3-5 years. This was suggested by the GB in the previous meeting. The board members appreciated it and were in sync with the observations and perception of the Principal.

Picking the point of the collaboration with external world indicated during presentation, Prof. Gadre volunteered to help with mentorship of UG/PG students and faculty on the grounds of the IIT model. At IIT he has been involved in activities where students are made partners. The activities involve students from other institutes creating massive online material. He offered

10th GB/3rd Sept 21

Munshi Nagar, Andheri(W), Mumbai - 400 058.

to involve SPIT faculty and students in creating NPTEL resources. The members of the GB appreciated this. After this, with the permission of the Chair, proceedings of the regular agenda items started.

1. Confirmation of minutes and action taken report.

The minutes of the 7th meeting of Governing Body, held on 26th December 2019 as annexed in **annexure A** were circulated to all the members. These minutes are again read out by the Principal for the confirmation, and action taken (as annexed in annexure A) are narrated. Since no suggestions were received, the minutes of the 7th meeting are confirmed by the GB.

R8/01: The minutes of the 7th meeting of the Governing Body, held on 26th December 2019 are confirmed and actions taken are noted.

2. Revised Budget for 2020-21 and proposed Budget for 2021-22.

The principal briefed about the impact of the pandemic on the institute budget and presented the need for revision as the expenditure could not take place as planned due to the ongoing pandemic, and institute discontinued 17 ad-hoc faculty. The approved budget has a deficit of Rs. 60 lakhs. The revised budget has a surplus of Rs. 4.52 crores assuming SP.I.T continues to pay as per the 6th pay commission, and a surplus of R. 1.84 crores if the 7th pay is implemented by the institute, in the financial year 20-21. Similarly, he presented the budget for the year 2021-22 based on the demands from the various departments, salary expenditure (assuming 7th pay will be implemented), and average expenditure on other items. Shri Mhatre inquired about the assumption made regarding resuming the normal, in person teaching on campus and highlighted that this pandemic has huge impact on the Budget. Principal informed that the proposed budget is prepared in anticipation that the on-campus teaching will resume in July 21, i.e. from the beginning of the next academic year. Shri Mulla remarked that this is quite an optimistic view. Shri Mhatre suggested to approve the revised budget for the year 20-21 and suggested to have a quarterly budget till the classes resume.

The Principal invited the attention of the members towards the major reasons that necessitated the revision of the 2020-21 budget such as reduction of 17 ad-hoc faculty, reduction in procurement and reduction in the electricity charges etc. Shri Mulla expressed that as the faculty is getting more time, the budget on account of activities like consultancy, training, faculty development programs etc. could have been utilized fully. He also expressed his concerns regarding the FRAs response towards the surplus budget and its possible impact on the fees collection. Prof. Iyer opined that fees revision uncertainty is not only due to Covid, in fact, Maharashtra system can have more uncertainty than what covid can create. He further informed that there was large uncertainty how the fees were fixed based on 2 year earlier expenditure, divided by all students to be collected only from first year students. Thus, while discussing this budget what fees will be received depending on new courses etc. should also be considered. He suggested that the budget will have to be reviewed by taking into consideration 7th pay as well as changes due to new courses etc. He further opined that Budget should reflect

12
4/10

**Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF TECHNOLOGY**

(Autonomous)

Munshi Nagar, Andheri(W), Mumbai – 400 058.

what is planned. Prof. Prachi Gharpure pointed out that if revised budget for 20-21 shows surplus then the expenditure of 20-21 would be considered to fix fees for the

year 2022-23 by the FRA. She remarked that if we would have implemented 7th pay by then things could have been normal, but due to lesser expenditures in 2020-21, the sanctioned fees for the year of 2022-23 would be less and severely impact the finances of the institute. Principal informed about the recent appeal FRA has made to all engineering institutions regarding cutting the fees or not revising it. Prof. Gadre suggested to show provision for the implementation of the 7th Pay in this budget. Prof. Prachi Gharpure informed the board that the FRA does not accept the provisions in the budget and considers only incurred expenditure. Prof. Rathod pointed out that the budget should have been presented in the Finance Committee before the GB and suggested to relook at depreciation amount. He also pointed out that some expenses like sanitization etc. appear missing in the budget. Principal accepted this and ensured that the budget will be presented in finance committee first, before presenting to the GB. He clarified that all expenses incurred have been included, probably the heads had been titled differently.

After these discussions, the GB has approved the revised budget for the year 2020-21 and suggested to keep the approval for the budget 21-22 aside owing to several uncertainties about the fees collection, resumption of normal campus life, and clarity about the FRA policy. The GB suggested to have quarterly budget instead, till the normal life resumes and there is more clarity about the income through fees.

R8/02:- The GB approved the revised budget for the year 2020-21 and suggested to provide quarterly budget for the year 2021-22.

3. Application to AICTE for merger of the courses.

Principal briefed the GB about the undergraduate courses offered by the institute and pointed out that institute presently runs 4 undergraduate courses namely (a) Computer Engineering (b) Information Technology (c) Electronics Engineering (d) Electronics and Telecommunication Engineering. He informed about the challenges institute is facing for admissions to the Electronics Engineering course. Further he informed that a lot of laboratory infrastructure is remaining unutilized due to the compartmental approach institute has had. He pointed out that elite institutions in the country do not follow this trend. Further, at a national level, there is same curriculum and question paper for the GATE examination of Computer and IT students. Similarly, it is same for "Electronics" and "Electronics and Telecommunication" courses.

He reported that recently curriculum for both the courses in the same domain is changed significantly and a foundation in the form of common fundamental subjects is made for both the courses. The specialization or toning is attempted in the form of sequel of several elective subjects. This unification of core curriculum is praised by academic experts of the various Board of studies and Academic Council. He highlighted that the merger of the same domain courses will optimize the physical, computational,

SL

3/10

↓

Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF TECHNOLOGY

(Autonomous)

Munshi Nagar, Andheri(W), Mumbai - 400 058.

laboratory and human resources available with the institute and will make some laboratory and allied infrastructure available for the expansion or induction of additional courses. Shri Mhatre remarked that merging of Electronics with Electronics and Telecommunication is welcome. However, he expressed his concerns over merging of Computer and I.T courses. Prof Gadre informed the GB that IITB has Computer Science program which has both the dimensions and recommended the merger of courses as those on complementary to each other. Shri Mhatre agreed on this.

Prof. Bhirud commented that though the syllabus for Computer and IT courses needs to be different as per UOM syllabus, the courses are only shifted from one semester to the other. He also briefed about the choices of students during admissions. He suggested that the space occupied by the 2 depts can be utilized better on merger. Same infrastructure can be utilized better by increase in the intake. Thus, merging will help in expansion of the intake. Shri Mhatre raised the query on what will be done with the faculty. He raised concern on seniority among the merged departments. Suggested to tackle this sensitively. Principal informed that the institute has already a rotation policy for section heads and deans. He also pointed out that he observed the healthy environment and culture at the institute. Prof. Gadre suggested to nominate Head and Associate head and could interchange their responsibility every half year or a year. Principal appreciated this and remarked that this is unique suggestion. He agreed to implement it at the institute. Shri Mulla suggested to keep a close watch on the HR issues. Prof Gadre suggested to avoid any change in the functionary positions at the Departments.

Principal informed that due deliberations with all faculty on this proposal of merger of courses were already done, and all faculty consented for the proposed change. Prof. Iyer suggested that reconstitution of Board of Studies, Academic Council and revision of syllabus should be put in place parallelly so that people should not feel that IT has been taken out and abolished. Merger is a great opportunity not only for optimizing resources but also to encourage higher academic standards. He further pointed out to look at reconstituting the roster. Prof. Prachi Gharpure cautioned that the roster would be a big issue with University as they consider it as shutting a branch and starting a new one. Prof Bhirud pointed out that any way the institute must relook the roster due to change in cadre ratio norms of AICTE. Prof Prachi pointed out that the GB had given permission to continue with 1:15 STR. Principal assured the GB to revisit the issues of the seniority carefully and closely, cadre ratio, accreditation, professional standing etc. He informed that we need to encourage students to learn from NPTEL/MOOCs etc., we need to encourage industry internships as well. While low STR is good, faculty should not be under-utilized. After all these deliberations, all members consented for the proposed merger of the courses

R8/3(A):- The GB resolves merger of Electronics Engineering Course(60 intake) and Electronics and Telecommunication Engineering Course(60 intake) to Electronics and Telecommunication Engineering Course (120 intake) from the academic year 2021-22.

Munshi Nagar, Andheri(W), Mumbai – 400 058.

R8/3(B):- The GB resolves merger of information Technology Course(60 intake) and Computer Engineering Course(60 intake) to Computer Engineering Course (120 intake) from the academic year 2021-22.

4. Application to AICTE to start new undergraduate courses.

Principal narrated the need of economy for manpower in the emerging areas such as data science, machine learning, AI, robotics and automation, cyber security, Industrial IoT, mobility etc. Various surveys and reports are vectoring towards the present need of professionals in these domains and postulating the growth of these sectors. AICTE has declared the list of emerging areas and appealed the well performing institutions to introduce new courses in these domains at UG/PG level. He informed that many colleges in the state and our immediate competitors have introduced these courses from the academic year 2020-21. He pointed out that it is possible to add two more undergraduate courses within the available physical infrastructure by some rearrangements. He proposed to add two new courses at the undergraduate level.

1. B. Tech. Computer Science and Engineering (Data Science)
2. B. Tech. Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Prof. Gadre welcomed this proposal and suggested to look at a dual degree programs in the long run. Prof Rao pointed out the present admission challenges for M.Tech courses and also informed that institute cannot even close those programs as those are the prerequisite for a PhD program. Shri Mhatre raised the concerns that colleges who have started AI/ML courses are not getting competent faculty. He gave an example stating people who are super specialized in AI/data science are very few and charging exorbitant. They get huge salaries in industries. Thus, the whole gamut of syllabus, keeping it update is a challenge. Prof. Gadre agreed with these views and suggested to encourage young faculties and to groom them to gain these high-end skills. Shri Mhatre suggested to identify potential young faculty and train them.

Prof Rathod suggested to have one course in Robotics and AI (going towards Electronics domain) and Data Science (going towards computer Domain). Principal pointed out that being self-financed institution, we need to also look closely at the admission dynamics and social preferences towards different branches of engineering. Prof. Bhirud pointed out that Robotics will need huge investment and a new set of laboratories, while the proposed courses can be easily accommodated. Prof Gadre suggested to have a broad base approach for undergraduate courses, and systematically groom the faculty. After these deliberations, the GB resolved to permit the institute to apply to the AICTE for starting of these courses from the academic year 2021-22.

R8/4:- The GB approves the proposal to start two new undergraduate courses namely (a) B.Tech Computer Science and Engineering (AIML), and (b) B.Tech Computer Science and Engineering (Data Science) from the academic year 2021-22.

as/10

Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF TECHNOLOGY

(Autonomous)

Munshi Nagar, Andheri(W), Mumbai – 400 058.

The Institute is directed to apply for these courses to the AICTE and complete the necessary formalities with the AICTE, Mumbai University, DTE, Government of Maharashtra and the Head office of BVB.

5. 7th Pay Implementation to faculty and staff at S.P.I.T.

Principal briefed about the need of 7th pay implementation. He informed the GB that the AICTE has recommended 7th pay scale for all faculty and staff of technical institutions of the country on 1st March 2019. He informed that subsequently, Government of Maharashtra has declared the 7th pay implementation with the G. R. Dated 11th Sept. 2019. The Government and aided institutions in the State have implemented the 7th pay scales to the employees. Three well performing autonomous self-financed institutions have implemented 7th pay recommendations for their employees. He informed that institute faculty and staff are also expecting 7th pay implementation and his office has received many such requests from faculty and staff. He presented a brief review of financial status of the institute and invited attention of the members towards the surplus due to pandemic, incurred expenses and incomes, % expenditure on the salary, fees fixed by FRA for the institute, for past 5 years and requested the members to express their views and guide over this important matter.

He mentioned the sustainability of the institute in case if the tuition fees are not increased by FRA for two years. Vice Principal has reminded that there was no case in the past where the legitimate expenditure is not considered by the fees fixation committee. Prof Rao informed that as and when Institute requested fees rise with proper justification, institute got it sanctioned. He has also highlighted the possibility of a reduction in the fees due to reduced staff, maintenance bills due to lockdown. Members have expressed sooner or later we need to implement the pay recommendations. Principal explained the working of the FRA and pointed out that FRA works on the principle of reimbursement which expects institute to spend and recover the expenditure gradually in a cycle of 4 years. Prof. Gadre pointed out that without such implementation, the gap between the income and incurred expenditure will be clearly visible and will impact the future income significantly posing financial challenges 2 years down the line. Chairman suggested to wait for some time till few more institutions in Mumbai implement it. Principal, insisted to set an example to the other institutions by early implementation. He pointed out that there is no question of choice in this regard, as every AICTE approved institute is expected to implement it and have given few examples where in the self-financed colleges were forced by the judiciary to implement it. Shri Mulla sir echoed this and suggested to implement it at the earliest. After these deliberations all members have consented to the implementation of the 7th pay from 1st April 2020. However, they expressed the concerns like cash flow, risk factors involved while sanctioning the fees, by fees fixation committee and possible delay of the social welfare department in the fee's reimbursement.

The Principal has suggested three options for implementation: (A) The date of implementation in the ideal case, is 1st January 2016 as per the government declaration. (B) The Government resolution of the 7th pay is of dated 11th September 2019, hence it can be implemented from 11th Sept 2021 and arrears to the date to be paid. (C) Few

82

06/10

Bharatiya Vidya Bhavan's
SARDAR PATEL INSTITUTE OF TECHNOLOGY

(Autonomous)

Munshi Nagar, Andheri(W), Mumbai - 400 058.

reputed private institutes implemented it from 1st April 2020. Since the current financial year is 2020-21, majority of the members have recommended implementing it from 1st April 2020 so that the surplus of the budget of 2020-21 can be reduced and its impact on cash inflow from tuition fees in future can be arrested. It was also discussed that possibility of implementation from the date of announcement of the 7th pay by the

Government of Maharashtra is not possible as the balance sheet of 2019-20 is already audited and FRA will not take the cognizance of arrears in the fees calculations. Shri Mhatre sir reminded that this proposal being related with finance, needs to go through the finance committee. Chairman has recommended preparing an exhaustive report, revisit the financial situation and cash flow carefully and submit the implementation plan through the finance committee.

After these discussions and deliberations, all members have unanimously given a consent for 7th pay implementation from 1st April 2020.

R8/5(A):- The GB resolves to implement 7th pay to all permanent faculty and staff of the institute from 1st April 2020.

R8/5(B):-The GB resolves to pay the arrears from 1st April 2020 till date to all permanent faculty and staff of the institute.

6. New Academic Model at SPIT

Principal presented the salient features of the New Academic Model articulated at the S.P.I.T. He expressed that the institute already had few initiatives taken. He explained how this model aims at implementation of few suggestions of National Education Policy 2020. The members appreciated the model and suggested a careful implementation.

The GB noted the salient features of the new model and appreciated it and suggested a careful implementation for fulfilling the objectives.

7. Admission Statistics 2020-21

A brief statistic of admissions to undergraduate courses was presented by the Principal. The members were satisfied to note the increased response in terms of the applications received and increase in the closing percentage despite the challenges posed by the pandemic.

The GB noted the improved admission scenario for the undergraduate admissions.

8. Placement statistics for 20-21 and Internship statistics.

Principal has briefed about the placement of the students. He informed that the institute has observed growth in number of placements, quality of placement, average salary of the campus, and internship offered, despite COVID scenario. He also pointed out that

SL (07/10) L

SARDAR PATEL INSTITUTE OF TECHNOLOGY
(Autonomous)

Munshi Nagar, Andheri(W), Mumbai - 400 058.

the average CTC and the median salary of the institute is comparable to centrally funded institutions like new IITs/IIITs/NITs.

The GB noted the same and appreciated the efforts of the TPO team and faculty and staff of the institute.

9. Academic Results 2019-20

Principal informed the GB regarding challenges faced by the institute in running T-L-E processes completely in online mode. He briefed about the special policies articulated with due deliberations and its careful implementation carried out. He also presented the academic results of 2019-20.

The GB noted the results and policy articulated by the institute and expressed the satisfaction towards it.

10. NBA compliance report and NIRF ranking 2021

Principal briefed the GB about the NBA status and institute application for NIRF.

The GB noted the same.

11. Creation of new facilities during 2019-20 (Action Taken Report)

New facility and shifting the faculty rooms were approved by the GB. The work is completed in all respects, and faculty have shifted to the new faculty rooms created. The action taken report was presented to the GB.

The GB noted the same and appreciated the initiative.

12. Product Development Center (Action taken report)

A facility is created for institute students for the product development. However, due to the pandemic, its utilization to full extent could not take place. The brief report on the PDC was presented to the GB.

The GB noted the same and suggested to start utilization to the best possible extent.

13. Capital Expenditure towards compliance for Fire NOC certificate as per AICTE norms

A report about the fire system work was presented to the GB, and efforts undertaken towards obtaining fire NOC as required by AICTE were briefed. Principal informed that the work necessitated the construction of the pump house and electricity room and obtaining the building stability report. He also thanked Prof. Murdi of SPCOE for

Handwritten signature and date 08/10

SARDAR PATEL INSTITUTE OF TECHNOLOGY

(Autonomous)

Munshi Nagar, Andheri(W), Mumbai – 400 058.

providing such a certificate at no cost. He informed the GB that the process to obtain the NOC will be initiated soon

The GB noted the same and suggested to obtain the NOC as soon as possible.

14. Fee Fixation proposal for the year 2021-22

Principal briefed about the fees fixation proposal submitted by the institute to the FRA with the approval from the Chairman. He further informed the GB that the institute has positively responded to the appeal made by the FRA to retain the fees and preferred to retain the previous year fees instead of going for the fee's revision. Thus, fees fixed by FRA for the academic year 20-21 is retained for coming academic year 2021-22 by the institute.

The GB noted this and echoed the decision of Chairman.

15. Status of Mr. Hemant Vasaikar case

The Principal informed about the status of inquiry initiated against Mr. Hemant Vasaikar and the challenges posed by the pandemic. He further informed that this matter has come to closing and committee is expected to submit the report within a couple of months.

The GB noted this.

FOR RATIFICATION

16. Minutes of Academic Council held on 26th March 2021 (Will be tabled at the time of meeting).

R8/6:-The minutes of the 6th academic council held on 26th March 2021 are ratified.

17. Minutes of Equipment Procurement Committee (To be briefed by Vice-Principal, Dean R&D).

R8/7:-Minutes of Equipment Procurement Committee are ratified.

18. Procurement of Juno Software (ERP).

Principal brief about the need of a sound ERP for the institute and the process followed to identify the ERP vendor for S.P.I.T. Shri Mhatre informed that S.P.C.O.E is getting a free ERP from the Government and suggested to go for it. Prof. Chaudhari pointed out that SPCOE is getting it as it is the part of TEQIP. Further he pointed out that all four institutions on the campus, anyhow, have gone for four different products. A detailed

note on the procurement of JUNO ERP for S.P.I.T was presented. The Chairman had approved this procurement.

R8/8:- The procurement of JUNO (ERP System for S.P.I.T) is ratified.

19. Revised Honorarium rates

Principal presented the revised honorarium rates for different experts, events. Chairman had approved these rates.

R8/9:- The revised honorarium rates are ratified.

20. Ad hoc Appointments of Professors.

Institute had given adhoc appointment to Dr. Rajendra Sawant and Dr. Radha Shankarmani with the approval from GB. Dr. Sawant's appointment was up to July 2020. Considering the needs of the institute Dr. Sawant's appointment is continued for next 2 years with Hon. Chairman's approval. Similarly, as the performance of Dr. Radha is excellent, her appointment is continued till Dec. 2021 as per GBs recommendations.

R8/10:- The Ad hoc Appointments of Dr. R.R. Sawant and Dr. Radha Shankarmani are ratified.

21. Any other item with the permission of Chair

NIL

The principal thanked all the members for their inputs and valuable suggestion, and with the permission of Chair the meeting adjourned.

MINUTES OF MEETING

Meeting Name:	Internal IQAC meeting		
Date of Meeting	3/7/2021	Time:	2:30pm
Minutes Prepared By:	Ananthalakshmi V	Location	Virtual
Meeting Agenda : 1. To discuss activity plan for IQAC calendar 2. Approval of IQAC manual			
Present Members: Prof B N Chaudhari, Dr Pooja Raundale, Prof Manish Parmar, Prof Pallavi Thakur, Prof Pramod Bhide, Prof Rupali Sawant, Prof Ananthalakshmi			
Topics	Discussion		
1. Presentation of IQAC Activities planned for next semester	Prof Pooja Raundale presented the IQAC activity plan for next semester / academic year 22-22 and celebration of various events during the next semester Also discussed the IQAC manual prepared by Prof Ananthalakshmi Internal and academic audit timelines were also discussed		
2. Principal Comments	Dean, IQAC to coordinate with Dean (Academics, student affairs and R & D) to ensure targets are met Appraisal, Mentoring, Audit and Accreditation to be the focus areas for IQAC team <u>Appraisal :</u> • Self appraisal document submitted by IQAC team in Jan 21 to be finalized and presented before IQAC team on 7th July, 2021. 360° feedback to be a subset of self appraisal process <u>Mentoring :</u> • Manual on Mentoring process prepared by Dr Rita Das and Mrs Ananthalakshmi to be reviewed in weeks time. Manual resent by Mrs Ananthalakshmi <u>Audit :</u> • Internal audit of last academic year to be completed over the next two weeks before commencement of next academic year • Two or three senior professors of each department to conduct the audit. Extc department to conduct audit of Electronics department, Computers department to conduct audit of IT, IT department to conduct audit of MCA and IT and MCA department to jointly conduct audit of Computers department • Academic audit to be conducted domainwise by two experts virtually. Individual faculty to interact one to one with the experts for better understanding. Audit of question papers also to be carried out alongside. Audit to completed by end of July. • Prof Pooja Raundale to discuss existing domain segregation with all HoDs explore if additional domains are required for existing courses		

- Existing templates for internal and academic audit to be shared with Principal for review and suggestions

Accreditation :

- Target date for filing of application for NAAC by Dec 2021.
- Aim should be to score A+ grade so that autonomy is extended for another six years
- Annual report of IQAC for AYs 20-21 and 19-20 to be prepared

Miscellaneous

- Internal IQAC members to continue.
- Among the external members, Dr Daruwalla and Prof Katchi to continue. Two other experts from engineering background to be added. Some suggestions given by Principal were Prof Sutaone, Dy Director, C.O.E.P, Dean, Academics, C.O.E.P, or senior professors from Ramdev Baba College of Engineering or Walchand college of engineering.
- IQAC activities to be prioritized in the following order : Audit, **June Implementation** and NAAC accreditation

Raundale

Criterion 6 - Governance, Leadership and Management

Key Indicator 6.2 Strategy Development and Deployment

Metric No 6.2.3 Implementation of E-Governance in Areas of Operation

ANNUAL REPORT ON E-GOVERNANCE

Annual e-governance Report for Academic Year 2018-2019

A structured organization with well defined functions and policies help any institution to grow. Further, if e-resources are used to manage the overall administration, it helps the institution to manage the work at enhanced speed, reduced cost and maintain transparency. The use of ICT is becoming the backbone of any country's growing economy in today's world of internet enabled systems and processes. Bhartiya Vidya Bhavan's S.P.I.T. in its institutional values states inclusive development of a nation which is the necessity of a good higher education system in any country. For this reason, Sardar Patel Institute of Technology, Mumbai has taken several initiatives to use e-Governance.

From its inception in 1995, as S.P.C.E. (Unaided Wing), the institute has initiated e-governance in the areas of Finance & Accounts, Examination, Library and Examination. In

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

view of this, the institute procured Salary Software "Smart Pay" with operational guidance and support from Smart Infotech, Mumbai. This facility is utilized by the accounts section of the institute to manage the salary of the staff. This software is used to manage several processes with respect to the salary and other aspects of accounting. The institute also uses Tally ERP 9 software with an operational support from Bhavans head office for Accounting and Finance related matters. The data generated by this software is used for MIS and Auditing purposes.

The Central Library (Knowledge Resource Centre (KRC)) of the institute always strives to maintain and add e-learning resources for the benefit of teachers and the students to the Central as and when required. In this year, library procured Integrated Library Management System (ILMS) having easy to use Graphical User Interface: SLIM 21 (System for Library and Information Management) software version 3.6.0.31681 for automation in the library with the operational guidance and support from Algorithms Consultants Pvt. Ltd., Pune, Maharashtra for using this software. The Central Library is fully automated. The Online Public Access Catalog (OPAC) can be accessed from <https://172.16.70.82/w27/>. All the operations of the library such as circulation, cataloging, invoicing, journal entry is done through this software. The library has a software integrated with QR-Code system to keep the records of transactions for available learning resources. The library uses barcode scanners for faster and accurate circulation as well as to keep the records of transactions of learning resources.

According to the policy of e-governance of the institute, the library has to renew the subscribed e-resources. Library also has perpetual copies of some of the e-books. Accordingly, in this academic year, the library has e-resources such as IEEE ASPP + POP (All Society Periodical Package + Proceedings Order Plan), and ACM Digital Library and E-Books of Wiley (21 titles) and Springer (8000+ titles).

In 2005, the institute was established in its new building under the name and style of Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology. This year the Biometric system was introduced. Staff are required to mandatorily register their attendance using the system by either their finger impression or face. The records of the same are strictly monitored for their attendance and incoming, outgoing timings.

In the Academic Year 2017-18, the institute received an Autonomous status. The institute continued to use the existing e-governance tools. However, to meet the increasing need of academic standards, the institute added e-governance in other areas of administration

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

In this academic year, the entire building of the institute is brought under surveillance by installing CCTV cameras at various places to keep a track of what is happening at the institute with a TV screen at the security with the operational guidance and support from Indus Cartel Pvt. Ltd.

Feedback is an essential element of the learning process. The institute collects the feedback on various aspects at the institute through online Google Forms. The feedback collected from the individual faculty, Dean, HoDs are analyzed and suggestions are communicated to IQAC & Head of the institute for its action plan in subsequent academic year. The Internal Quality Assurance Cell (IQAC) regularly collects online feedback from various stakeholders of the institute through its structured G Form available on the institution web portal to seek suggestions for its various policies and overall institutional growth.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

ANNUAL REPORT ON E-GOVERNANCE

Annual e-governance Report for Academic Year 2019-2020

E-governance is of utmost importance to help streamline operations, maintain transparency and utilize the available resources efficiently. Realizing the significance of e-governance in educational institutions, S.P.I.T. continues to maintain its academic excellence by maintaining the existing e-resources and continual enhancement in the existing e-resources as and when required.

As per the mandate of the affiliating University of Mumbai, advertisements for faculty & staff positions are published in newspapers. However, from this academic year the institute has started posting advertisements on the website under the tab "Employment". The Adhoc faculty positions are also published on this webpage. Moreover, in order to ease the process of applying for these available positions, a candidate may submit his/her application through this online job portal. This has resulted in addition of one more e-governance feature in the office administration.

The institute has achieved one more milestone of e-governance in the areas of academic administration by installing LCD projectors in almost all the classrooms and laboratories. Smart Televisions are installed in a few of the classrooms which can be used by teachers as an interactive teaching aid. LabVIEW is mainly used for building a GUIs for systems and also it is utilizing inherent parallelism for instrumentation, control system and robotics. Measurement data visualization, ease of interfacing with instrumentation etc are the advantages. S.P.I.T has

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

also extended its use for development of Virtual Labs. Faculty as well as students of the institute can use this facility remotely and it is also made available to outside faculty and students on demand.

As per the circular from Affiliating University of Mumbai (UoM), the thesis of Ph.D. scholars of the institute are submitted to the PG section of UoM. All the submitted theses can be accessed on the largest repository of PhD theses in India via <https://shodhganga.inflibnet.ac.in/handle/10603/449359>. In this academic year, the Central Library of the institute is enabled with Wi-Fi facility. The Internet Center with 10 PCs to access the subscribed e-resources and freely available resources like NPTEL, ShodhGanga, etc is also established in this academic year. Library created an Institution Repository on intranet with open-source software: DSpace having Institution events, reports, institutional magazines, faculty publication, question papers, syllabus etc. In addition, to create the contents of the DSpace repository like scanned Question papers, a scanning facility is enabled at the library with the help of a scanner which can scan 20 pages per minute.

According to the policy of e-governance of the institute, the library has to renew the subscribed e-resources. Library also has perpetual copies of some of the e-books. Accordingly, in this academic year, the library has e-resources such as IEEE ASPP + POP (All Society Periodical Package + Proceedings Order Plan), and ACM Digital Library and E-Books of Wiley (21 titles) and Springer (8000+ titles). In this year, the institute has extended the e-resources at the library by including two online platforms namely Turnitin and Manupatra. First, to support the research needs, and to ensure good quality project reports & publications, the institute has procured a pioneered Turnitin Plagiarism software in this year. Secondly, the central library of the institute has procured Manupatra: An online database for legal research to conduct the course on Law for Engineers.

The examination cell of the institute is automated as per the needs from time to time. In this academic year, the examination cell started using the DSpace open-source digital repository maintained by the library to upload examination schedules and results.

The institution has a very effective e-student support system managed by its organizational structure with well defined functions of each. The e-governance in the category of Students Admission and Support starts with e-governance in First Year (F.E.) Admission which is one of the best practices of the institute. The F. E. admission process of the institute takes place in 2 categories namely Admission via CAP rounds and Management Quota Admissions. The first category of admissions are entirely controlled by the Directorate of

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

Technical Education. However, for the Management Quota Admissions, the institute has adopted a completely electronic infrastructure that includes online application form, online upload of the relevant documents and an online Admission Enquiry Portal available through the institute's website. The institute is also equipped with an online fees transfer mechanism for admission fees to all its students via proCampuz Cloud ERP Suite.

The Research and Development (R & D) cell of the institute uses inhouse developed online portal to manage applications of fees reimbursement for the research-oriented papers published by its faculty and students, its approval status, and reimbursement status. This portal eases this process and maintains transparency. The Training and Placement Office (TPO) of the institute has a well-defined process for managing the records of the placed students as well as students opting higher studies. The students seeking admission to higher studies in India or abroad need recommendation letters. In order to ease the process of applying for recommendation letters, approval by faculty, and most importantly to keep a track of this process, an online portal of recommendation developed by the institute is effectively used by the TPO.

Mostly the students of the institute from various parts of the city use local railways for commuting to the institute and wish to avail travel concession from railway authority under students category. According to the rules and regulations of the railways, the students need to fill the railway concession form and approve it from the office of the institute. To ease the process and maintain transparency, the online portal is developed by the institute which is managed by the administrative office from this academic year.

The online portal for e-transcripts is developed by the institute which is managed by the Examination cell for providing e-Transcripts after students' requests are received via an online portal and on payment of fee. Students need to send these e-Transcripts to foreign universities while applying for higher studies. The Examination cell of the institute manages true copy verification using this portal.

In this academic year, the institute has taken a major decision to install a fire fighting system with operational guidance and support from Indus Cartel Pvt. Ltd, Mumbai as a safety precautionary measure and to fulfill the mandatory requirements of any building. In view of that a complete Fire Fighting system with integrated Public Address system is installed in the entire building: The system is completely automated.

During the odd semester of this academic year, the institute had to discontinue its entire governance in physical mode at the campus to virtual mode. This was a disruption in the

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

governance of education and any of the organizations. The institute decided to go virtual in the Month of March 2020. In order to deliver the academics online, the institute procured G Suite for conducting video meetings apart from its other features like professional email, online storage, shared calendars, and more. Google's Apps make collaboration simple and effective. Institute decided to exploit the capabilities of G-suite in teaching, learning and other management processes.

Thus, S.P.I.T. has been progressing in all the areas of e-governance. In this academic year, the institution has taken significant decisions to enhance the e-resources in the areas of Academic, Students Admission and Support as well as Library. Most importantly, after the declaration of Pandemic year by the World Health Organization (WHO) and the decision of the State Government to work from home, the institute's quickest decision to procure G-suite for video meeting and go online without sacrificing a single day of the academic calendar to continue academics would be remembered forever as an indication of institutes willingness in adoption to e-governance.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

ANNUAL REPORT ON E-GOVERNANCE

Annual e-governance Report for Academic Year 2020-2021

. In this academic year 2020-21, the entire institute was in virtual mode from the month of July 2020. The entire resources of the institute were completely revamped to deliver excellence not only in the areas of academics but also in Office Administration, Finance & Accounts, Library and Examination.

The institute was using G-suite to deliver its academics, the Pen tablet or Graphic tablet or Writing Pads were proved as a complementing gadgets in online teaching-learning. During this year, the institute encouraged its use in teaching, learning and approved the reimbursement of expenses incurred for purchasing it.

During this Covid pandemic, the institute also identified the need of ERP platform for use in Office Administration, Admission, Academics, Examination, Outcome based Education (OBE) implementation. The institute purchased JUNO ERP with the operational guidance and support from Juno Software Systems Pvt. Ltd., Pune. for effective administration in all fronts of academics.

Moodle is a Learning Management System (LMS) designed to provide educators, administrators and learners with a single robust, secure and integrated system to create personalized learning environments. Moodle delivers a powerful set of learner-centric tools and collaborative learning environments that empower both teaching and learning, while at the

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

same time allowing teachers and trainers to customize their course according to their own preferred methods. In the academic year 2017-18, S.P.I.T. Moodle server was established as a Learning Management System (LMS) platform. The Faculty were motivated to use this platform for uploading course material, and maintaining students' academic record. Most of the teachers and students of S.P.I.T were very much conversant with Moodle for evaluation of assignments and other short exams for their courses. Almost all the faculty members effectively used Moodle during this year. The Faculty members also used Google Classroom integrated with the institute's academic licenses of G-suite.

Conducting laboratory sessions was a challenge during this time. The Faculty of the institutes used Virtual Labs developed by the other institutions of repute to conduct and evaluate laboratories effectively. During the pandemic time, the institute identified the need for a tool which provides unlimited uses on and off campus, and on any device. The institute took one step ahead by procuring a Campus-Wide License that provides unlimited use of MATLAB and Simulink products to all its faculty, staff, students, and researchers. Matlab, a product of Mathworks Inc. is a powerful software tool to carry out several programming related implementations and other model based implementations used for academic study purposes and even extensively useful in research.

In this academic year, the institute took a courageous step by integrating Moodle with AI powered Proctoring Tool for invigilation while conducting the End Semester written examinations of long durations also. This Proctoring Tool has several features like prevention of access to websites, browsers, as well as a second monitor, hotkeys blocked, and virtual camera with broadcast, etc.

In this academic year, the JUNO ERP platform was rigorously used in the admission process. Several important stages of admission like application submission, scrutiny process, merit list generation etc, were carried out through this portal in online mode. This facilitated a smooth admission process during pandemic times.

According to the policy of e-governance of the institute, the library has to renew the subscribed e-resources. Library also has perpetual copies of some of the e-books. Accordingly, in this academic year, the library has e-resources such as IEEE ASPP + POP (All Society Periodical Package + Proceedings Order Plan), and ACM Digital Library and E-Books of Wiley (21 titles) and Springer (8000+ titles), and online e-learning platforms like Turnitin. In this academic year, the library also subscribed for e-books from McGraw Hill Publication (34 titles) for 5 years and Pearson (43 titles) for 1 years in this academic year to meet the demands of learning resources remotely due to the pandemic and enabled remote access to these

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

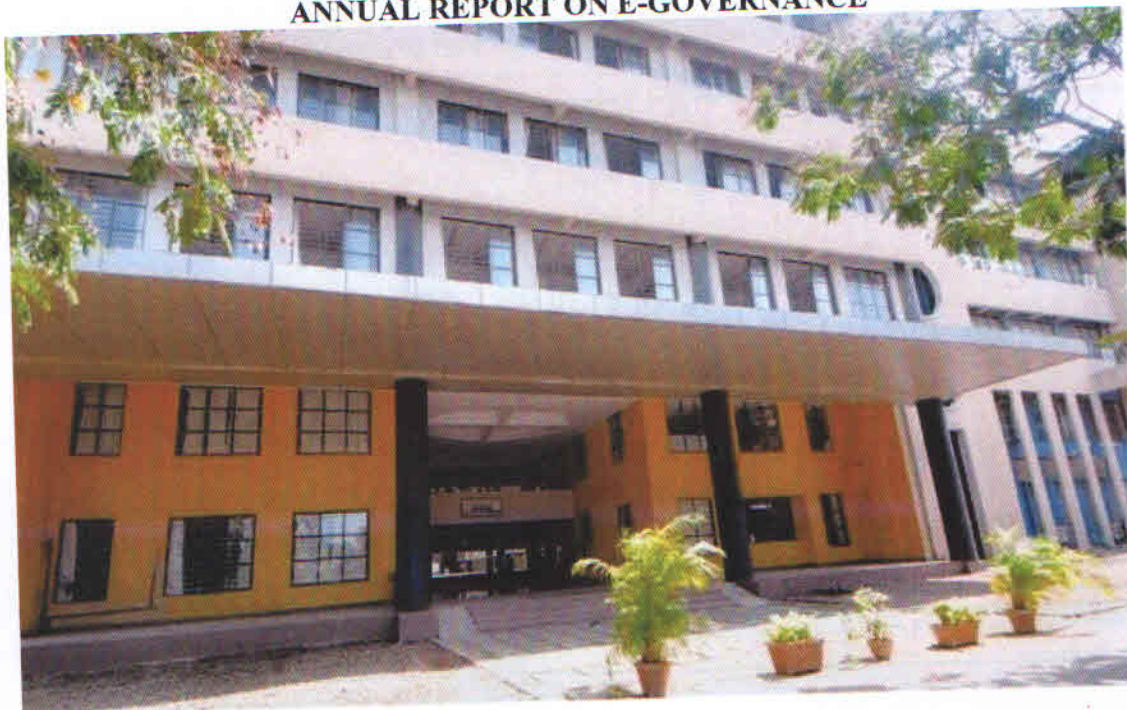

resources. The Dspace digital repository was made available remotely for the faculty and students to access the Question Papers of previous years, schedule of the examinations, result, etc.. The central library of the institute took one step ahead and converted the required chapters of the printed books to e-content by scanning and making it available to respective faculty as and when required via G-Mail or Social Media.

During the pandemic time also, the entire institution was engaged in adopting and effectively using the e-resources either procured by the institute, or developed by the institute in house or available freely over the internet. The e-contents developed by the institute during this time would serve as a rich resource to generations next.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

ANNUAL REPORT ON E-GOVERNANCE

Annual e-governance Report for Academic Year 2021-2022

In this academic year, the entire institution was virtual till March 2022. After that, the institute was trying to come back to its new normal mode of functioning as that of the entire globe after the impact of Covid 19. The institute continued using e-governance in the areas like Finance & Accounts, Library as well as Feedback.

The institute also continued its online mode of education as effectively as demonstrated during the academic year 2020-21. Moreover, it was decided to install Smart TVs at remaining classrooms and new laboratories resulting in almost all the classrooms and laboratories ICT enabled and prepared for hybrid mode of Teaching Learning and Evaluation (TLE). This has resulted in significant changes in the areas of Academic Administration.

According to the policy of e-governance of the institute, the library has to renew the subscribed e-resources. Library also has perpetual copies of some of the e-books. Accordingly, in this academic year, the library has e-resources such as IEEE ASPP + POP (All Society Periodical Package + Proceedings Order Plan), and ACM Digital Library and Turnitin Plagiarism software. It also has E-Books of Wiley (21 titles) and Springer (8000+ titles), McGraw Hill Publication (34 titles).

The institute decided to use the Grade card generation and printing digitally replacing the traditional method of Grade Card generation via VIVA tool and printing the Grade Cards

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

from third party vendors. The Examination section of the institute procured SeQR portal for generation of Grade Cards of all the students. The institute also procured a Konica Minolta BiZHub C226i Printer integrated with SeQR portal for printing of Grade Cards with better quality. This has been a significant change for e-governance in the areas of Examination making it more self reliant.

In this academic year as the institute was coming back to its offline mode, it was decided to replace the existing CCTV surveillance system by installing CCTV cameras with advanced features at places like all the classrooms, new laboratories, etc.. The college campus is now equipped with CCTV cameras installed at various places with operational guidance and support from Electrocon Consumer Electronics (I) Ltd., Navi Mumbai to keep a track of what is happening at the institute with TV screens at the security as well as at the office of the Head of the Institute. From this academic year, the centralized Public Address system integrated with the Fire Fighting System is used in emergencies to broadcast voice messages. It is also effectively used during the FE Admission process to address the students and parents time to time about updates of the availability of seats and any announcements whose seating arrangement is spread across the various floors of the building. Along with the use of ICT enabled classrooms and Public Address system, this year has embarked the entire F.E. Admission process at the institute going completely digital.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

ANNUAL REPORT ON E-GOVERNANCE

Annual e-governance Report for Academic Year 2022-2023

In the academic year 2022-23, S.P.I.T continued to focus on implementing existing e-governance policies in the area of Academic Administration with enhanced features and promoting additional e-governance features in the area of Student Admission and Support.

The institute realized the importance of developing e-contents of the learning materials for the benefits of students as it can be preserved digitally. Multimedia is changing the way of communication with each other, making teaching and learning effective. Varieties of products and services are going digital. Digital content is the future as realised specially after Covid 19. The education industry has also seen an incremental jump in covid times. Thus, hardware and software facilities at the digital studio can be used meaningfully to produce high quality visual and audio content. Considering this significant role and impact of e-content in academics, the institute and its incubation center SP-TBI under sponsorship from DST Nidhi Prayas has set up a digital studio equipped with state of the art tools and equipment which assists in development of e-content required for academic purpose. A digital studio at S.P.I.T. encourages faculty members to drive innovation in teaching and learning methods. A digital studio also helps in increasing their efficiency, reduced cost, bringing transparency, ease team work and solving many bottlenecks in creating content. The institute has also developed an online mechanism to book the slots for efficient utilization of this facility.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

Realizing the constraints on using the JUNO ERP tool for F.E. students admission, the institute decided to procure "Digitaledu" for the admission process from the academic year 2022-23. The institute continues to use an Admission Portal on the institute's website where apart from all the details of the F.E. admission, the online admission application process is established. Candidates seeking admission fill the application form along with all his details and then the institute carries scrutiny of those applications.

According to the policy of e-governance of the institute, the library has to renew the subscribed e-resources. Library also has perpetual copies of some of the e-books. Accordingly, in this academic year, the library has e-resources such as IEEE ASPP + POP (All Society Periodical Package + Proceedings Order Plan), and ACM Digital Library Turnitin Plagiarism software. It also has Books of Wiley (21 titles) and Springer (8000+ titles), and McGraw Hill Publication (34 titles).

The institute always strives to involve its stakeholders in each and every activity of the institute. The institute believes that its students are always first in this category. In order to achieve this mission, and to foster strong bonds between Alumni, Students and to get values for all stakeholders as well as growth in professional life, an online portal developed by the institute named SP-AN (Alumni Network) is very effectively managed by the Dean Students Affairs. Through this portal, passed out students of the institute can register to join the community of S.P.I.T. Alumni Network. Faculty members are also registered as an integral part of this network. Further, the Alumni can apply online, and may get contacted as & when there would be any suitable match for relevant activity or any vacancy position.

With an initiative of Internal Quality Assurance Cell (IQAC), in this academic year an inhouse online Self Appraisal platform is developed by the students who have undergone 6 months internship. This online Self Appraisal platform is proposed to be used shortly.

Overall, the academic year 2022-23 is thrilled with significant changes in the e-governance areas of Academics and Students Admission & Support apart from continuing the best practices of e-governance in the areas of Library, Finance & Accounts and Feedback.

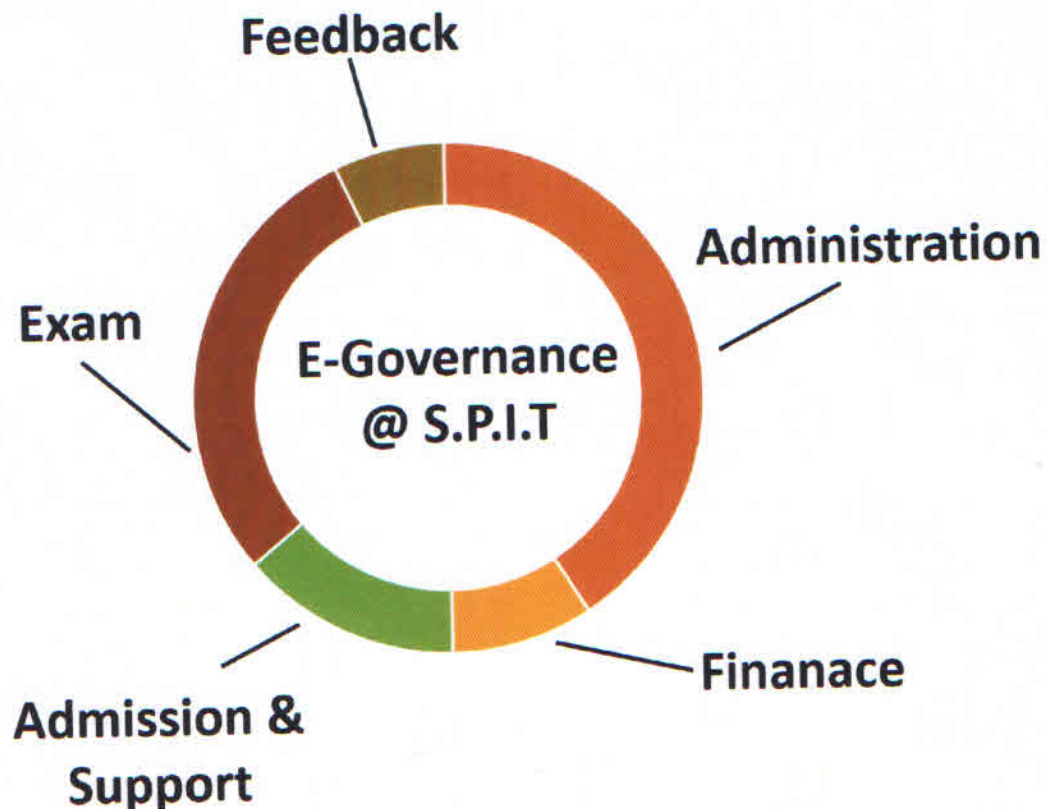

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.

Introduction to e-governance at S.P.I.T

Bhartiya Vidya Bhavan's S.P.I.T. in its institutional values states inclusive development of a nation which is the necessity of a good higher education system in any country. The use of ICTs in admission process, maintenance of students' personal and other academic records, submission of class assignments and projects, monitoring and evaluation, and communications with the stakeholders is unavoidable for sustainable development of the educational establishments. Therefore, at S.P.I.T. several initiatives are taken to use Electronic Governance (e-Governance) which is becoming the backbone of any country's growing economy in today's world of internet enabled systems and processes.

It is revealed that E-Governance @ S.P.I.T. as shown in Fig. 1 is playing a vital role in supporting powerful, efficient management and administration. Also, this technology can be used right from student administration to various resource administration in educational institution and it is creating transparency between the institute and students.

Dean, Administration
Bharatiya Vidya Bhavan's
Sardar Patel Institute of Technology
Andheri(W), Mumbai-58.
